Discover DBS

Deep Brain Stimulation
(DBS) Therapy

Join us for an informational webinar:

Advancing care in the treatment of Parkinson's disease

If you or a loved one has been diagnosed with Parkinson's disease, you may be considering your treatment options. Hear from a Movement Disorder Specialist about living with Parkinson's and whether DBS therapy can be an option for you.

Bring your questions!

*Only your doctor can determine
if DBS therapy is right for you.*

Presented by:

Drew Falconer, M.D.

Neurologist, Movement Disorder Specialist
Inova Parkinson's and Movement Disorders Center
Falls Church, VA

For more information about DBS therapy, visit [DiscoverDBS.com](https://medtronic.com/DiscoverDBS.com)

This therapy is not for everyone. Not everyone who receives DBS Therapy will receive the same results. DBS Therapy requires brain surgery which can have serious and sometimes fatal complications. Once implanted, DBS complications may require additional surgery. Medtronic DBS Therapy may cause new or worsening neurological or psychiatric symptoms. For further information, please call Medtronic at 1-(877) 438-3574 and consult Medtronic's website at medtronic.com/PDsafety. Patients should always discuss the potential risks and benefits of the therapy with a physician. A prescription is required.
