CLINICAL ENDPOINTS
CONNECTING PATIENTS WITH HOPE

Goals

- To provide concierge-level service that begins with our expert staff. Led by renown Board Certified physicians that partner with us to provide first-class patient services, and clinical staff that support our physician team that are highly trained and experienced in clinical research.
- We pride ourselves on connecting patients with hope, by providing a wide-ranging portfolio of promising clinical trial treatments
- Working closely with the community and our industry partners to bring groundbreaking clinical trials to the Scottsdale area, to better serve our community and support their healthcare journey
- Expanding our portfolio to better serve the wide array of diseases that community faces

Current Portfolio

We are currently focused on Neurological diseases, and hope to expand this focus in the future

Current Areas of Study

- Parkinson's Disease
- Essential Tremor
 - Migraine
- Alzheimer's Disease
- Multiple Sclerosis

We regularly have multiple studies running, and often have more than one study for the same disease
